QUALITY PROCEDURE	Incoming Inspection of Packaging Materials		QP-308 Rev D
PLANT 2	Dept: **Quality**	Effective: **2023-10-09**	By: P. Nakamura Appr: H. Costa

Purpose

Stop bad bottles, caps, labels and cases at the dock, before they reach a line.

Scope

Every delivery of bottles, caps, labels and shipper cases.

Roles

Role	Responsibility
QA Technician	Inspects and releases or rejects each lot.
Receiving Clerk	Holds the delivery in quarantine until release.
Purchasing	Is told of every rejection.

PPE

- Safety shoes
- Cut-resistant gloves

Tools

- Calipers
- Check scale (0.1 g)
- Go/no-go neck gauge
- Barcode verifier

Materials

- Bottles
- Caps
- Labels
- Shipper cases

Procedure

For every lot

Step	Who	Action
1	Receiving Clerk	Place the delivery in the quarantine lane with a yellow QUARANTINE tag. See WH-601.
2	QA Technician	Check the supplier is on the approved list in QP-309. If not, reject.
3	QA Technician	Check the certificate of conformance is with the delivery and matches the lot number.

Checks by material

Step	Who	Action
4	QA Technician	Bottles (sample of 13): weight, height, neck finish with the go/no-go gauge, no flash or contamination.

5	QA Technician	Caps (sample of 13): size, colour, liner present, fit on a sample bottle.
6	QA Technician	Labels (3 rolls per lot): artwork and revision against the binder, print quality, barcode grade C or better, roll width, core diameter 76 mm, labels wound outward.
7	QA Technician	Shipper cases (sample of 5): dimensions, board grade stamp, print.

Decision

Step	Who	Action
8	QA Technician	Pass: green RELEASED sticker on every pallet or roll. Record on FRM-QA-08 Incoming Inspection Record.
9	QA Technician	Fail: red REJECTED tag, hold as described in QP-315, and email Purchasing the same day.
