QUALITY PROCEDURE	Nonconforming Product and Hold		QP-315 Rev C
PLANT 2	Dept: **Quality**	Effective: **2022-04-18**	By: P. Nakamura Appr: H. Costa

Purpose

Keep product or material that might be wrong from being shipped or used.

Scope

Finished product, product in process and packaging materials.

Roles

Role	Responsibility
Anyone	May place product on hold.
QA Technician	Decides what happens to held product.
Team Leader	Makes sure held product is tagged and moved.
Quality Manager	Approves scrap above 500 dollars.

PPE

- Safety shoes

Tools

- Red HOLD tags

Materials

None.

Procedure

Placing a hold

Step	Who	Action
1	Anyone	Attach FRM-QA-15 Hold Tag to every pallet, roll or tote in question. Write the reason, the lot code and your name.
2	Team Leader	Move held product to the hold cage the same shift. Nothing on hold stays at the line.
3	Team Leader	Tell the QA Technician.

Disposition

Step	Who	Action
4	QA Technician	Inspect within one working day. Decide: release, rework, return to supplier or scrap.
5	QA Technician	Rework follows QP-318.
6	QA Technician	Record the decision on FRM-QA-16 Disposition Record. Scrap above 500 dollars needs the Quality Manager's signature.

7	QA Technician	If held product has already shipped, start a lot trace as described in QP-316.
